

NA
NORTH AMERICAN HYDRAULICS

PLANETARY DRIVES
TRACK WHEEL IN-LINE DRIVES

FEATURES

- Torque ratings up to 2 million ft. lbs.
- Compact modular design for retrofitting and integrated systems
- Forged steel materials for some applications and planetary carriers
- Optional multi-lubrication parking brakes
- Numerous output configurations

NA
NORTH AMERICAN HYDRAULICS

AXIAL PISTON PUMPS AND MOTORS
HEAVY DUTY DESIGN

FEATURES

- Improvement from 2000 to 3000 psi
- 20° mesh technology
- Super-Piston Roper design
- Compact design, High Power Density
- Fast Responding, Excellent Pressure Fluctuation

NA
NORTH AMERICAN HYDRAULICS

CONTINUOUS ROTATORS

FEATURES

- Technology
- with low slipping
- High pressure with low
- torque and low

NA
NORTH AMERICAN HYDRAULICS

HYDRAULIC POWER UNITS

FEATURES

- Custom, size or fluid health
- Custom designed to your specifications
- Up to 10,000 psi capacity
- For use with auxiliary functions or stand alone systems
- Hydraulic or Fuel powered

NA
NORTH AMERICAN HYDRAULICS

SYSTEM INTEGRATION

WORLD CLASS PRODUCTS

- Motors
- Pumps
- Valves
- Steering
- Controls
- Transmissions
- Cylinders
- Accumulators
- Power Units
- Filtration

NA
NORTH AMERICAN HYDRAULICS

LOW SPEED HIGH TORQUE MOTORS

FEATURES

- Applications ranging from 2 and 1/2 to 100 hp/rev
- Compact design with a rotating housing or shaft
- Ability to mechanically transmit all torque speeds
- Multiple speed options with shift on the fly capability
- Operating speeds up to 300 rpm and pressures to 4,000 psi
