

North American Hydraulics, (NAHI, LLC), partnering with O&K and Bonfiglioli a global leader in power transmission solutions for mobile and industrial applications.

Features and Benefits:

- Large taper roller bearings for support of excessive machine weight and generated torques
- Use of high-quality forged steel for spindles and planetary carriers for less deflection
- Precision ground planetary gears for greater efficiency
- 3 to 7 planetaries per stage for better load distribution
- Ring gears are tempered, hardened steel for longer life

Proven Solutions for:

- Track
- Wheel
- Winch
- Road Milling
- Cutter
- Reel
